EDUCATION

Institute of Technology and Management, Gwalior

Bachelor of Technology in Computer Science

November 22 – Present

Pragati Vidya Peeth School, Gwalior

Central Board of Secondary education

July 2021 – May 2022

SKILLS

- Problem Solving, Data Structures and Algorithms, C++
- Web Development : HTML, CSS, JS

PROJECTS

Spotify clone -

- Developed a music streaming platform inspired by Spotify, enabling users to search, play, and manage their music library.
- Demonstrated proficiency in integrating API calls for fetching song data, playlists, and user information, ensuring smooth interactions and real-time updates. By implementing effective error handling and responsive loading states, the platform offers a reliable and seamless user experience.
- Implemented RESTful API endpoints for playing, pausing, skipping tracks, and managing playlists, using Express.js for routing.
- Designed a user-friendly interface for browsing songs, albums, and playlists, incorporating dynamic elements such as search functionality and personalized recommendations. The platform is optimized for efficient song data retrieval and provides a smooth, engaging music experience.
- The project showcases expertise in front-end and back-end development, combining HTML, CSS, JavaScript, and Node.js to deliver a functional and interactive music streaming application

Portfolio -

- Developed a dynamic portfolio website to showcase personal skills, projects, and achievements, enabling visitors to explore the creator's professional background and work.
- Demonstrated proficiency in designing an interactive and user-friendly interface, ensuring a seamless browsing experience across multiple devices. By strategically implementing responsive design techniques and optimizing page load times, the portfolio website offers fast performance and accessibility to users.
- Implemented smooth navigation through internal links, enabling easy access to different sections of the website, such as the introduction, project gallery, testimonials, and contact form.
- Designed the front-end using HTML and CSS, with custom animations and styling to create an engaging user experience. JavaScript was used to enhance the interactivity, including project filtering and dynamic content loading.
- The project highlights expertise in front-end development, showcasing a polished, professional, and visually appealing personal brand through a well-structured and responsive portfolio website.

ABOUT ME

As an adept programmer skilled in HTML, CSS, JavaScript, I seek a fresher role where I can utilize my technical expertise and leadership qualities in collaborative team environments. With a passion for technology and keen attention to detail, I consistently deliver high-quality results. My commitment to continuous learning drives me to stay current with industry trends, making me an asset to any dynamic organization.
